Question **1**

Correct

Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using counter method.

```
void reverse(int n)
{
   int rev = 0, remainder;
   while (n != 0)
    {
        remainder = n % 10;
        rev = rev * 10 + remainder;
        n/= 10;

    }
print(rev);
}
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:
A positive Integer n
Output:
Print the value of the counter variable

Answer:

```
#include <stdio.h>
int main(){
   int rev = 0,n,remainder,c=0;
   c++;c++;
   scanf("%d",&n);
   c++;
   while (n!= 0) {
       c++;
        remainder = n % 10;c++;
        rev = rev * 10 + remainder;c++;
        n/= 10;c++;
    }
//printf(rev);
printf("%d",c);
c++;
return 0;
}
```

	Input	Expected	Got	
✔	12	11	11	✔
✔	1234	19	19	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
